

**11th  
Annual**

# Miller Angus

**Bull  
Sale**

**Thursday, March 29, 2018 at 2:00 p.m. GT**

**Valentine Livestock Auction**

*126 N. Government St., Valentine, Nebraska*

***Selling 27 Yearlings***

***8 Fall Long Yearlings***

***23 Stout 2-Year Old Bulls***

***Sale Bulls Offered***

- Bulls are progeny of a true, non-pampered cowherd. The cows perform on their own.
- Proven feed value. The 103 heifer and steer mates of last year's offering graded 100% Choice or higher, with yield 2, 3 and 4s.
- Great selection of both high growth and calving ease genetics.
- Multiple sets of full brothers offered.
- Bulls come complete with genomically enhanced EPDs, 100% first year breeding guarantee, and disposition second to none!

***Elite Angus Genetics,  
Developed for the  
Commercial Cattlemen!***

## Miller Angus 11th Annual Bull Sale

Thursday, March 29, 2018 at 2 p.m. CT

Valentine Livestock Auction

126 N. Government St., Valentine, NE

Sale Day Phone: (402) 376-3611 or 1-800-682-4874

Auctioneer: Matt Lowery, 308-750-6119

Bulls available for viewing March 28th

**DVAuction**  
Broadcasting Real-Time Auctions

Come early! Lunch will be served prior to sale.

Real time bidding & proxy bidding available.

View and bid online: [www.dvauction.com](http://www.dvauction.com)

Make sure you're registered to bid by March 28.

**Herd Health:** Bulls will be fertility tested and scrotal measured by Dr. Steve Schumacher, DVM, Valentine, NE. Health papers will be furnished for interstate travel. The bulls have been calfhooed vaccinated for viral infections; including both strains of BVD, pasteurilla, 7-way and then boosted. The bulls have passed a recent test for BVD. Bulls have been poured in the fall of 2017 and spring of 2018 with Ivermectin. The bulls have been developed without a high amount of grain and long stem hay to

insure soundness. All pre-choice bulls will have a foot rot shot. All bulls will be semen evaluated before the sale.

**Terms & Conditions:** The cattle sell under the standard terms and conditions as adopted by the American Angus Association. Registration papers are available upon request. All bulls sell full possession unless otherwise noted. Retaining 1/3 semen interest on all bulls. If we decide to collect for our own use, it will be at buyer's convenience and seller's expense.

**Guarantee:** No matter the price, all bulls have a one breeding season guarantee. A breeding season is defined as 60 days from first day of turn out. The bull's problem has to be confirmed by a DVM and cannot be a result of neglect. Ultimately, if a problem arises, contact us. We value our customers and want to ensure happy customers throughout the breeding season!

**Performance Information:** A supplement sheet will have scrotal measurements on sale day.

**Delivery:** Bulls can be delivered, free of charge, within 200 miles of sale beginning April 1. A \$50.00 discount will be applied on any bull picked up at the ranch after sale by purchaser.

### Dear Cattlemen,

We would like to invite and welcome you to our 11th Annual Bull Sale on March 29th, 2018. We appreciate your new and/or continued interest in our program. Miller Angus is a family owned and operated ranch that has had one goal in mind from day one. That goal is to provide quality Angus bulls that you can trust throughout all three seasons - breeding, calving, and weaning. It is important for us to have a satisfied customer year-round, and not just on sale day. Through selective genetics, we are confident that this year's crop of bulls will once again do just that.

New to our offering this year we have developed a 2 year-old and fall bull program. We did this to offer our customers a more age advantage bull that we have really developed to thrive in the Sandhills environment. These bulls are not left over sale bulls from last year, they were specifically selected, being the top cut from the younger age bulls in 2016, to carry over into the 2-year old bull program.

2017 found an up-trending market, and the arrow continues to move in a more favorable direction. Still it is of the utmost of importance to make the most of every investment. It is a must to point out that nearly 80% of the bulls offered in this year's sale rank in the top 50% of the breed for \$W, resulting in saying that an investment today will give optimal input costs on weaning value for years and years to come.

As always, our bulls were fed at home on the ranch. Our bulls are not overfed and fat; they are sound, athletic, and ready to go to work for you. We believe that, for the same reason, we have grown these bulls under correct conditions to ensure longevity. Further, our cowherd is truly non-pampered. We stand by this. We run our cattle in a strict commercial environment. We understand that most operations are not throwing out extra supplements, creep feed, or unlimited hay, so we aren't either. We have grown a program that makes our cattle perform under practical conditions.

We believe that our genetics are as good as any that can be found. Both EPD and genomically superior bulls that possess excellent phenotype back these bulls. All bulls offered on the sale are i50k tested, and therefore have had their EPDs enhanced and have been parent verified.

Lastly, we would like to give a special Thank You to all previous customers for your support over the years. Without your support and feedback this year's sale would not be possible. We appreciate working with you and hope to continue to do so in the future.

We hope to see everyone for the sale March 29th! If you have any questions or would like to view the bulls prior to the sale, give us a call anytime.

**The Miller Family - Phil & Pat, Landon, Danielle & Parker, and Luke Miller**

Growth EPD

Maternal EPD

\$ Value Indexes

## EPD Definitions

**Calving Ease Direct (CED)** characterizes an animal's genetic potential for unassisted births in first-calf heifers, with a higher value being more favorable to influence calving ease.

**Birth Weight (BW)** is an indicator of calf weight, with a lower value characterizing lighter birth weight calves.

**Weaning Weight (WW)** is an expression of genetic potential for calf weight at weaning, with a higher value indicating more pounds of weaning growth.

**Yearling Weight (YW)** describes an animal's potential for postweaning gain measured near one year of age, with a higher value reflecting more total pounds.

**Maternal Milk (MILK)** is an indicator of milk and mothering ability as expressed in daughters. A higher value characterizes more milk expressed in pounds of weaning weight in a daughter's calves.

**Heifer Pregnancy (HP)** is used as a tool to increase the chance of a sire's daughters becoming pregnant during a normal breeding season. Higher scores are considered more favorable.

**Carcass Weight (CW)** is a genetic predictor of hot carcass weight as measured at harvest time. A higher value characterizes more pounds expressed.

**Marbling (MARB)** is an expression of the potential to improve the USDA marbling score, which is used to predict Quality Grade in beef cattle. A higher value indicates a higher marbling score.

**Ribeye Area (RE)**, a predictor of ribeye area in a carcass of a sire's progeny compared to progeny of other sires. A higher value indicates a larger ribeye area.

**Weaned Calf Value (\$W)** is an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

**Feedlot Value (\$F)** is an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Beef Value (\$B)** is an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

- Member of pen of three bulls at 2018 Bull Bash.
- Individual WWR of 110.
- No creep actual WW 880 lbs. Dam weighed 1285 same day.
- Dam has BWR 3@88 with an individual BWR 83 WWR 109 and is a direct daughter of the most prolific pathfinder dam on the ranch who boasts a NR 9@107.
- Grandam is as perfect of a Sandhills cow as you will find. Moderate framed, easy keeping, with superior milking ability. Progeny and progeny of daughters like 292 consistently have risen to the top of our sales. We have been flushing 335 the last three years retaining as many females as possible. One simply can't have enough daughters out of a cow like this.
- If you're looking to take your breeding program to the next level, improving your growth, standing beside a top of the line set of replacement heifers, while still calving with this moderate of a birth, look no further. This is an investment that will return twice over in the years to come.
- Top 2% HP, Top 4% \$W, Top 10% WW/DMI/\$F, Top 15% CEM, Top 20% YW, Top 25% RADG, and Top 35% CED.
