

OAKWATER RANCH/ROCKING ARROW

37th Annual Charolais Bull Sale

April 14, 2020

1:00 p.m. CDT

Valentine Livestock

Valentine, NE

Oakwater Ranch

Greetings from Oakwater Ranch,

Welcome to our 37th Annual Charolais Bull Sale. The advantages of heterosis in a cattle operation is well documented. Research from Dr. David Lalman, Oklahoma State University shows that heterosis increases production 20-25% per cow. We encourage you to take advantage of heterosis by using an Oakwater bull and believe that you will be rewarded financially with added performance in your calf crop without any additional input.

We have included the Terminal Sire Index EPD generated by the Charolais Association. TSI is a combination evaluation number of individual bull differences. The TSI represents a dollar index per terminal progeny produced for a bull in the AICA database, ranking them for profit potential. This dollar index is to be interpreted much like a single trait EPD. For example, if Sire A's index is \$191.66 and Sire B's index is \$200.00, then we would expect Sire B's offspring to average \$8.34 more net return (\$200.00 minus \$191.66) than Sire A's offspring. We believe this EPD will be a beneficial tool in your selection process.

The past couple years have proven to be challenging times in the cattle industry. The industry has experienced record numbers of cattle, devastating challenges from Mother Nature, a soft cattle market coupled with increasing input costs. For those who have survived these challenges the future looks very promising. It appears the beef cow population is on the decline and the trend appears to be continuing. Mother Nature has provided us with a much friendlier winter to date and we hope that continues throughout the spring and summer. I just read an article in the February issue of Drovers titled Booming Trade Ahead. The points in the article address the new pacts with Japan and China, and that these agreements could be a game changer for beef over the next few years. I am encouraged by the outlook for the future and believe that there are signals for significant improvement.

We are looking forward to seeing you at the bull sale. Oakwater Ranch has focused on providing a consistent, uniform group of bulls that are realized by selecting for balanced traits.

As always, we welcome any questions that you may have. If we can be of any assistance in your selection process, please feel free to ask us. The bulls are at the ranch and you are always welcome to come take a look ahead of the sale. As in the past, the sale will be online at www.CattleUSA.com if you cannot attend. We will also have a couple of phones available for you to call in a bid if you wish, or you can leave a bid with any of us, as we always carry bids for customers who can't make it sale day.

On behalf of Oakwater Ranch
Dean Churchill

Oakwater Ranch/Rocking Arrow

Offers You...

- ✓ **67 Stout Yearling Bulls**
- ✓ **Uniformity**
- ✓ **Easy fleshing cattle**
- ✓ **Performance cattle with eye appeal**
- ✓ **Carcass and maternal traits**
- ✓ **Over 60 years of combined experience in the Charolais industry**
- ✓ **Dedicated customer service**
- ✓ **Performance and ultrasound data on bulls**
- ✓ **All bulls will pass a rigorous semen test**
- ✓ **These genetics produced some of the top commercial calves last fall**

THE OAKWATER ADVANTAGE

Oakwater Ranch/Rocking Arrow 37TH ANNUAL BULL SALE

Tuesday ♦ 1:00 p.m. CST
APRIL 14, 2020
Valentine Livestock Auction

VALENTINE, NEBRASKA

SALE DAY PHONE: 402/376-3611

TERMS & CONDITIONS

Terms and Conditions: The terms of the sale are cash or check payable to Oakwater Ranch unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released.

Breeding Guarantee: All bulls sell backed by the Oakwater Ranch Guarantee. They are guaranteed throughout the first breeding season against injury or death. If a replacement bull is not available, credit will be issued at the next annual sale. All claims for replacements need to be made by Sept. 1 of the current year. No guarantee is given that semen collected from these bulls will successfully freeze.

Bids: Each bull on which there are two or more bids will be sold to the highest bidder.

Disputes: In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters is final.

Announcements: Errors discovered in the catalog will be corrected by announcements from the auction stand at sale time, and such corrections will take precedence over the printed matter in the catalog.

Accidents & Liabilities: All persons attend the sale at their own risk, and the seller and sales management assume no liability, legal or otherwise, for any accidents occurring in, on or around the premises.

Health: All bulls have passed a breeding soundness exam and semen test conducted by Cherry County Vet Clinic of Valentine, NE. A veterinarian will be available sale day to provide health papers as needed.

Handling: Each bull will be at the purchaser's risk as soon as sold, but every precaution will be taken by the seller to give all animals the best of care until delivery.

HEADQUARTERS:
3362 Hunt Rd.

AUCTIONEER:

Jim Birdwell 580/695-2352

SPECIAL REPRESENTATIVES:

Scott Dirk, *Tri State Livestock News* 605/380-6024

Chris Buettler, *Midwest Messenger* 402/380-8244

Jason Hanson 402/649-0500

Internet Broadcast: This sale will be broadcast live via the internet through Cattle USA. Go to www.cattleusa.com to learn how the internet auction works. We suggest you do this in advance.

Phone and Mail Bids: Bidders unable to attend may send or phone their bids to the ring men, auctioneer or Oakwater Ranch. If you are unable to attend the bull sale and would like us to purchase bulls for you, we will do so with 100% satisfaction guarantee. Buyers unable to attend the sale may also participate on line at www.cattleusa.com.

Registration Papers: All bulls, except as noted in this catalog are registered with the American International Charolais Association.

Delivery policy: Bulls whose destination is within 250 miles of Valentine, NE will be delivered at no cost. Bulls that need to be delivered to a point more than 250 miles from Valentine will be delivered at a prorated basis to a central point. We will do everything in our power to keep this cost to our customers as reasonable as possible and will guarantee this cost not to exceed \$250 per bull. If there are any questions or concerns with the delivery procedure, please feel free to contact us prior to the sale. **If you bring your trailer sale day and haul your own - we'll deduct \$50 per bull.**

Bull Care: The bulls started the gain test on Nov. 5, 2019. The performance test was a 118 day period with ADG and adjusted Yearling Weight determined at that time. Ultrasound data was collected on Feb. 18, 2020 for all bulls. This information is in the catalog. All bulls will pass a semen and fertility test and scrotal measurements will be available sale day.

Lunch: Lunch available at 11:30 a.m.

Motel Accommodations:

Econo Lodge (402)376-3131

	5 (.27)	.37 (.26)	.010 (.24)	.32 (.20)	88	735	1241

- Keystone is an Impressive U502 son out of a Maximizer female that is producing moderate framed, thick made sons.
- Keystone ranks in the top 4% for Marbling, top 5% for Scrotal Circumference and top 6% for BW.

Feed efficiency is a significant profit driver. One pound of dry matter conversion can amount to more than \$40 with today's feed cost. More energy is needed by an animal to put on fat versus muscle, thus resulting in inferior feed conversion.

Watch your bulls during the breeding season

by Clay Wright, The Samuel Roberts Noble Foundation

Ok, you've spent \$50 on your bull's breeding soundness examination, and he's good to go. Or, maybe he's already out earning his keep in your spring calving herd. Many things can go wrong during a 60-90 day breeding season, however, so now is not the time to let him go unsupervised.

It is good management to observe him regularly to make sure he's still willing and able to do his job. I recommend watching him in action during breeding season. Obvious physical problems that may have arisen since turn-out can be detected and addressed, such as lameness or injury.

Another simple thing to do is record the number of cows and dates he services them. Then find those cows in 18 to 23 days to make sure they are not coming back in heat. That, of course, would indicate he may have become infertile and you could address it in a timely manner.

Social ranking or dominance in multi-sire herds is a key concept. Dominant bull(s) will breed more cows compared to less-dominant bulls, especially when older and younger bulls are used together. In a five-year study, the dominant bull of a four bull group sired 70.4% of the calves in the first year. The remaining three bulls, a 4-year-old, a 3-year-old and a 2-year-old, sired 16.7%, 7.4% and 5.5% of the calves, respectively. Dominance changed over time, but the dominant bull always sired the most calves.

Using bulls that are roughly the same size and age can minimize dominance. Also, because dominant bulls work harder, they lose condition quicker. Rotating these bulls out of the herd for a week or two of rest and added nutrition is one way to deal with this situation, and it gives the less-dominant bulls more chance to do their share. Another approach is to start the breeding season with older bulls and replace them with the younger bulls later.

Rotation can also be used simply to maximize the use of a bull battery made up entirely of young bulls. According to Dr. Selk at Oklahoma State University, "rotating them at a minimum of two weeks will allow for optimum reproductive performance and not allow young bulls to become too fatigued or lose condition too rapidly. If pasture and management capabilities allow, rotating young bulls once per week should slightly improve reproductive performance..."

Bulls need managed and provided for all during the year, but especially during the breeding season. It's too important to just turn them out and forget about them. Your next calf crop may be at stake.

Keep it real

In the pasture

Lower birth weight

■ MORE LIVE CALVES

Increased weaning weight

■ MORE POUNDS AT WEANING

In the feedlot

Higher yearling weight

■ MORE POUNDS, EFFICIENTLY

At harvest

Increased carcass weight

■ MORE POUNDS AT HARVEST

Larger ribeye

■ BETTER YIELD GRADES

More marbling

■ HIGHER QUALITY GRADES

Commercial cattlemen trust registered seedstock breeders to make documented genetic improvements that provide them the opportunity to succeed.

From 2004-2014, the 2015 AICA National Cattle Evaluation Genetic Trend illustrates Charolais seedstock breeders are doing their job!

The trend shows dramatic improvements in every trait of economic importance.

2004-2014 NCE Charolais Genetic Trends

	BW	WW	YW	CE	CW	REA	Marb
2004	0.8	19.1	33.7	1.6	11.4	.18	.01
2018	0.3	30.6	56.1	5.3	19.9	.69	.10

**More pounds.
More profits.**

Charolais keep it real.
