VALENTINE LIVESTOCK AUCTION

VALENTINE, NEBRASKA

The Sandhill's
BEST
Live Here!

Dear Cattlemen,

We would like to invite and welcome you to our 15th Annual Bull Sale on February 20th, 2022. We appreciate your new and/or continued interest in our program. Miller Angus is a family owned and operated ranch that has had one goal in mind from day one. That goal is to provide quality Angus bulls that you can trust throughout all three seasons- breeding, calving, and weaning. It is important to us to have a satisfied customer year-round, and not just on sale day. Through selective genetics, we are confident that this year's crop of bulls will once again do just that.

Over the past several years we have dedicated ourselves to providing age advantage bulls. This sale marks the completion of that goal. All of our genetics are finally offered and our two-year old bulls are non-topped. There is going to be a lot of meat go through the ring sale day, we are very proud of this powerful set of bulls.

As always, our bulls were fed at home on the ranch. These bulls have been fed ABSOLUTELY NO CORN or INHIBITORS to ensure foot and joint longevity. The bulls are sound, athletic, and ready to go to work for you. Further, these bulls are backed by a working cowherd. Our cows are truly non-pampered. We stand by this. We run our cattle in a strict commercial environment. We understand that most operations are not throwing out extra supplements, creep feed, or unlimited hay, so we don't either. We have grown a program that makes our cattle perform under practical conditions.

We believe that our genetics are as good as any that can be found. Both EPD and genomically superior sires that possess excellent phenotype are behind these bulls. All bulls offered, unless otherwise noted, are HD50K tested, and therefore come with enhanced EPDs with the greatest accuracy available. All HD50K tested bulls have been parent verified.

Lastly, we would like to give a special Thank You to all previous customers for your support over the years. Without your support and feedback, this year's sale would not be possible. We appreciate working with you and hope to continue to do so in the future.

We hope to see you for the sale February 20th! If you have any questions or would like to view the bulls prior to the sale, give us a call anytime.

The Miller Family

Phil & Pat; Landon, Danielle, Parker, Paxtyn & Piersen; and Luke Miller
(402) 823-4182 • Phil: (402) 389-0882 • Landon: (402) 389-0216 • Luke: (402) 389-0816

15th
Annual
Bull Sale

SUNDAY, FEBRUARY 20, 2022 • 2:00 P.M. CT
Valentine Livestock Auction
126 N. Government St., Valentine, NE
Sale Day Phone: (402) 376-3611 or 1-800-682-4874
Auctioneer: Matt Lowery, 308-750-6119

Luke Miller, 402-389-0816
Valentine Livestock, 402-376-3611

Herd Health

Bulls will be fertility tested and scrotal measured by Dr. Steve Schumacher, DVM, Valentine, NE. Health papers will be furnished for interstate travel. The bulls have been calf hood vaccinated for viral infections; including both strains of BVD, pasteurella, 7-way and then boosted. The bulls have passed a recent test for BVD. Bulls have been poured in the fall of 2021 and spring of 2022 with Dectomax and Ivermectin. All bulls have received a foot rot shot at the time of fertility testing. All bulls will be semen evaluated prior to the sale.

Bull Development

The bulls have been developed on a high fiber cake pellet and long stem hay to insure soundness and longevity.

Terms & Conditions

The cattle sell under the standard terms and conditions as adopted by the American Angus Association. Registration papers are available upon request. All bulls sell full possession unless otherwise noted.

Semen Interest

Miller Angus retains 1/3 semen interest on all bulls. If we decide to collect for our personal use, it will be at buyer's convenience and seller's expense.

Guarantee

All bulls selling for \$3,500 or more come with a first year breeding season guarantee. A breeding season is defined as 90 days from the first day of turn out. The bulls problem has to be confirmed by a DVM, and cannot be a result of neglect. If a bull is unable to continue his breeding season, a replacement bull will be provided if available; or a credit given towards one bull in next year's sale. Sale credit is determined by purchase price minus salvage value. Salvage value is set at \$1500 or weigh-up price, whichever is greater. If a problem occurs contact Miller Angus as soon as possible. We value our customers and want to insure your happiness throughout the breeding season. All claims must be made by September 1, 2022.

Supplemental Information

A supplement sheet will have scrotal measurements and any other updated information on sale day.

Delivery

All purchases of \$3,500 or more will be delivered free of charge to Nebraska and surrounding states. Free nationwide delivery on all purchases of \$10,000 or more. If prior arrangements are made, we can keep bulls after April 1st, but will charge a \$3 a day yardage fee per head. A \$50 discount per bull will be applied if bulls are picked up sale day.

Liability

All persons who attend the sale do so at their own risk. Miller Angus assumes no liability legal or otherwise for any accidents that may occur.

Cattle Viewing

Bulls are available for viewing at the ranch anytime prior to sale. Bulls will be available for viewing February 18th through sale day at Valentine Livestock Auction.

Food & Refreshments

Lunch will be provided at the sale by the Miller family starting at 12:00 CT on sale day. An announcement will be made for after sale hospitality.

Absentee Bidding

Watch and bid live on the bulls at www.dvauction.com or call and bid by phone, 402-389-0216 or 402-376-3611.

Multiple Bull Discount

A 5% discount will be applied to purchases of 5 or more bulls.

EPD Definitions

Calving Ease Direct (CED) characterizes an animal's genetic potential for unassisted births in first-calf heifers, with a higher value being more favorable to influence calving ease.

Birth Weight (BW) is an indicator of calf weight, with a lower value characterizing lighter birth weight calves.

Weaning Weight (WW) is an expression of genetic potential for calf weight at weaning, with a higher value indicating more pounds of weaning growth.

Yearling Weight (YW) describes an animal's potential for postweaning gain measured near one year of age, with a higher value reflecting more total pounds.

Maternal Milk (MILK) is an indicator of milk and mothering ability as expressed in daughters. A higher value characterizes more milk expressed in pounds of weaning weight in a daughter's calves.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Carcass Weight (CW) is a genetic predictor of hot carcass weight as measured at harvest time. A higher value characterizes more pounds expressed.

Marbling (MARB) is an expression of the potential to improve the USDA marbling score, which is used to predict Quality Grade in beef cattle. A higher value indicates a higher marbling score.

Ribeye Area (RE), a predictor of ribeye area in a carcass of a sire's progeny compared to progeny of other sires. A higher value indicates a larger ribeye area.

Weaned Calf Value (\$W), is an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Combined Value (\$C), an index, expressed in dollars per head, includes all traits that make up both \$M and \$B with an objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

Dam 201

DICKAUS FP LO 201 Dam of lots 12, 13, 14, 15

Maternal siblings of Lots 12, 13, 14, 15, spring and summer 2020

This is a proven and predictable pasture front cow we selected to hang our hat on.

A Final Product dam who is easy fleshing with massive volume and superior milking ability.

201 is fertile. She has been flushed eight times for an average of 14 frozen eggs.

Natural calf was the top selling yearling bull in our 2018 sale.

With ten eggs put in in 2019 and 102 eggs in 2020 and 2021, we look for 201 to begin her legacy.

Maternal brother of Lots 12, 13, 14, 15

Your NET WORTH is your NETWORK and this flush is in good company. 201 was flushed three times to Net Worth resulting in 15 full brothers and 11 full sisters. These four 2020 born brothers lead off.

Fall Bulls

❖ Dam 184 ❖

LPM MISS LILY 184
Dam of Lots 61,62,63

This is a model Sandhill's cow who speaks with performance. She is moderate framed, easy fleshing, and will wean top pen every year. We feature her here paired with SAV Net Worth 4200 for what we believe to be the best maternal mating to sell anywhere in the country this year; 7 Pathfinder Sires in this pedigree. If you are serious about your replacement pen resulting in cows that are going to go out and make a living for you, this flush is COMPLETELY WORTH IT.

She boasts an individual BWR 86, WWR 113.

She has proven natural progeny, with a BWR 3@96, 3@117.

Her dam has a BWR 7@96, NR 7@105.

All 3 of her past natural calves have sold on our sales, and was the dam of our featured flush by SAV Rainfall 6846 that sold in 2021.

*Some things are just
COMPLETELY WORTH IT!*
